Допълнителна информация за лектора:

Katarzyna is a graduate of University of Strathclyde, with almost a decade of experience in research and teaching at an academic level in Europe; a specialist in polymer chemistry and studies of chemical reactions' kinetics. Currently a Customer Consultant for Central-Eastern Europe in Elsevier. A knowledgeable expert on scientific databases and Elsevier solutions for researchers and information specialists, who is passionate about ethics in scientific publishing, as well as about widely understood bibliometrics.

If you have a suggestions or questions which you would like to be covered during the seminars, please reach out to the speaker via email: k.gaca-zajac@elsevier.com.

Допълнителна информация за семинара:

How to successfully write a research paper?

During this training the attendees will learn how to successfully write a good quality research paper, which will resonate well with the scientific community and will allow them to gain recognition. A summary of the best practices in writing will be presented and these are based on experience of researchers, editors and readers. The training is addressed primarily to young researchers, although senior academics are also welcome to attend.

How to choose the right journal for your paper?

Scopus is the largest abstract and citation database containing information on peer-reviewed literature published by more than 5,000 international publishers. The purpose of this tailor-made training is to familiarize researchers, librarians and information specialists with the content, as well as with the available bibliometric parameters within Scopus. Attendees will also learn about the most useful tools

and functions incorporated in Scopus, which allow them to make a fully informed and comprehensive choice of the journal in which they may publish. The training includes several on-line workflow examples and the participants are welcome to take active part.
